NEW ZEALAND AGENTS FOR KLEAR DRILL FOAM, HOUSTON WELL SCREENS

To Whom it May Concern

Clemence Drilling Contractors are NZ agents, resellers and users of Klear drill foam.

We have been using this product ourselves with considerable success. We have several top head drive rotary rigs drilling deep water bores in alluvial gravels to depths of 250 metres in sizes from 200mm to 400mm, all using Klear foam.

Our customers - other drilling companies in New Zealand - are also using this product with success.

This product in our estimation in New Zealand conditions is equal to any other name brand foam.

If you have any other queries please do not hesitate to call me on:

(0064)-3-327-4300

Regards,

Dave Clemence  
Director
